#### ABOUT US

- JHipster Core Team Member since 2015
- Gradle Stream Lead, Vue Maintainer
- JUG Paderborn Organizer
- Software Developer at wescale in Paderborn

# GREETINGS, HIPSTERS

## AGENDA

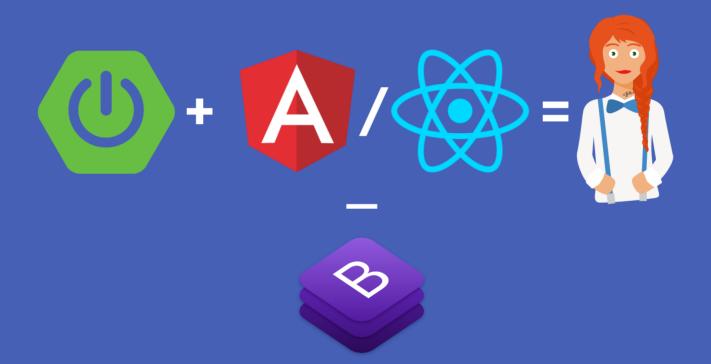

- Introduction
- Overview
- Demo

# How long does it take to setup a modern web application?

# How long does it take to configure databases, security, api?

How long does it take to go to production?

### WHAT IS JHIPSTER?

## WHAT IS JHIPSTER?

#### WHAT IS JHIPSTER?

TL,DR; JHipster is a development platform to quickly generate, develop, & deploy modern web applications & microservice architectures.

A high-performance and robust server-side stack with excellent test coverage

- A high-performance and robust server-side stack with excellent test coverage
- A sleek, modern, mobile-first UI with Angular, React, or Vue + Bootstrap for CSS

- A high-performance and robust server-side stack with excellent test coverage
- A sleek, modern, mobile-first UI with Angular, React, or Vue + Bootstrap for CSS
- A powerful workflow to build your application with Webpack and Maven or Gradle

- A high-performance and robust server-side stack with excellent test coverage
- A sleek, modern, mobile-first UI with Angular, React, or Vue + Bootstrap for CSS
- A powerful workflow to build your application with Webpack and Maven or Gradle
- A resilient microservice architecture with cloud native principles in mind

## OPTIONS

LIQUI BASE

AWS

Google Cloud Platform

OpenShift

Azure Spring Cloud

Travis CI

GitLab CI

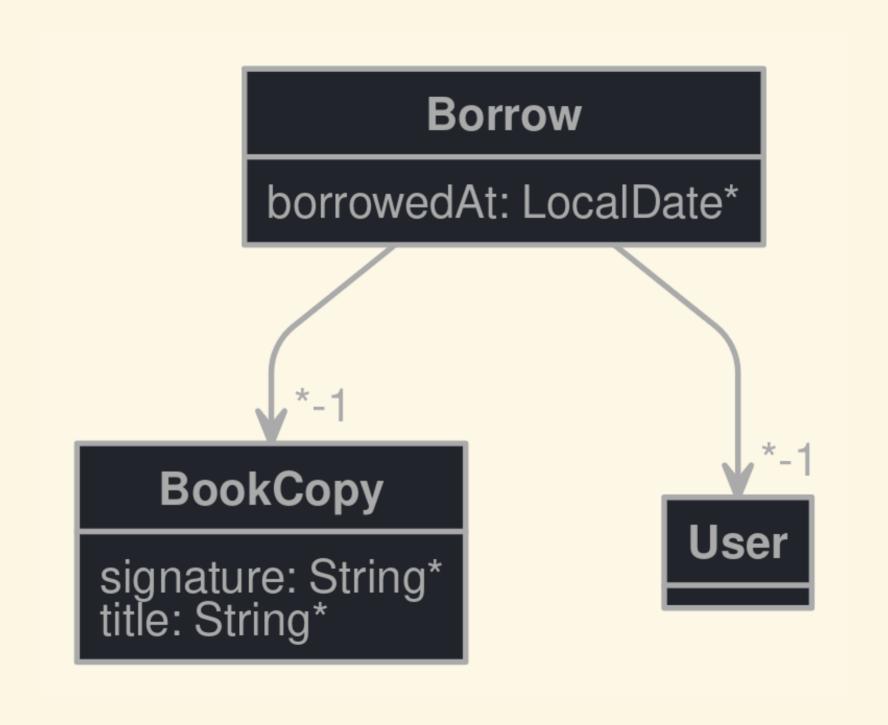

### GETTIN' STARTED

```
//Install node, java and git (optional)
npm install -g generator-jhipster
npm install -g generator-jhipster-vuejs
jhipster --blueprints vuejs
```

#### DEMO

- Generate a basic library application
- Short Walkthrough
- Generate CRUD capabilities
- Small changes to the code
- Build with Gitlab CI, deploy to Heroku

Learn JHipster in ~15 minutes with Matt Raible

#### SIDE-BY-SIDE APPROACH

```
@SuppressWarnings("unused")
@Repository
public interface BorrowRepository extends JpaRepository<Borrow, Long> {
}

@SuppressWarnings("unused")
@Repository
public interface BorrowRepositoryCustom extends BorrowRepository {
}
```

#### SIDE-BY-SIDE APPROACH

```
import BookCopyService from "@/entities/book-copy/book-copy.service";
export default class BookCopyServiceCustom extends BookCopyService {
}
```

Custom and Generated Code Side by Side with JHipster by Antonio Goncalves

Separating the JHipster layout from a custom UI implementation

#### GOING TO PRODUCTION

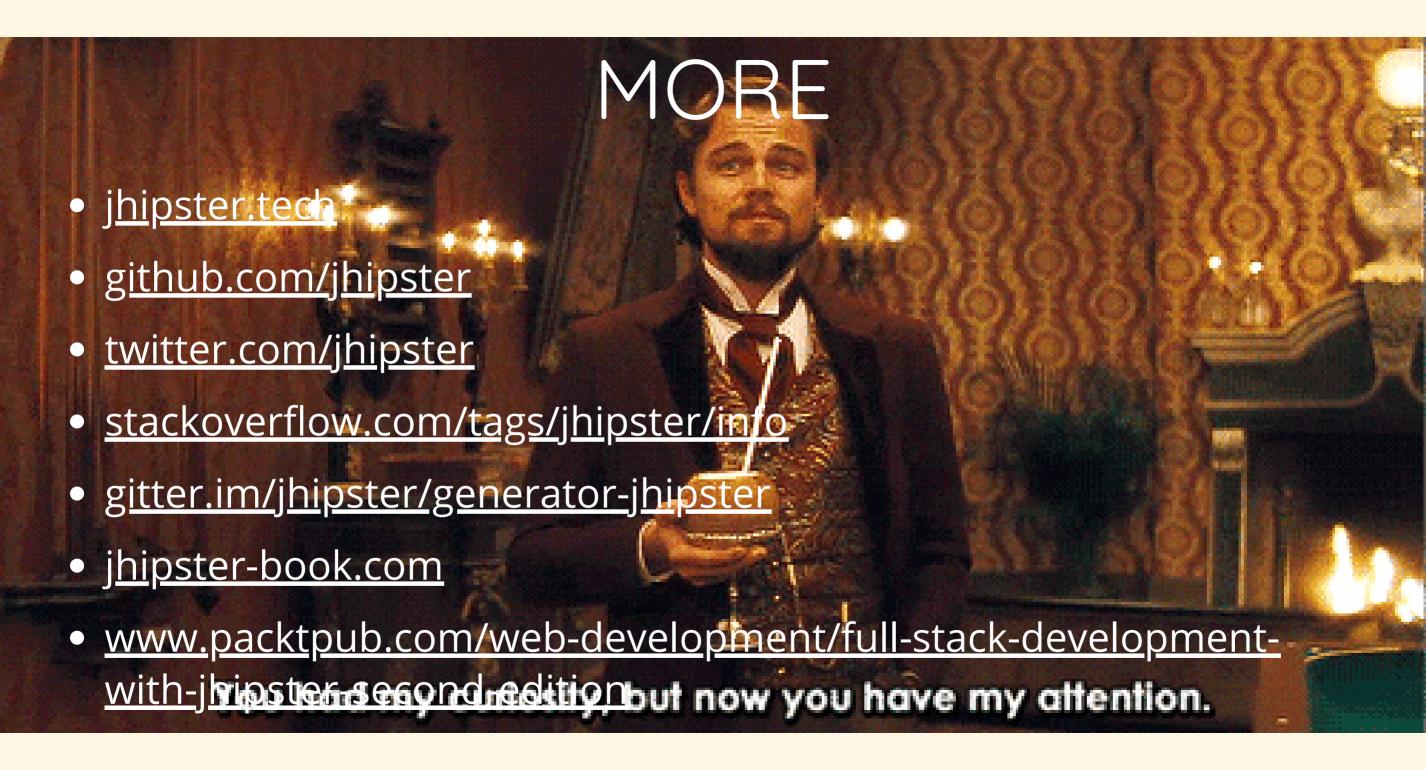

- Start with less
- Don't touch the generated code
- Keep JDL up to date
- Use same DB in Dev & Prod
  - Integrate Testcontainers
- Use DTO & Services
- Most likely you will add custom web api

#### FUTURE PLANS

- Polyglot
  - Kotlin 🗹
  - Node.js, .net 🖃
  - Micronaut, Quarkus
- Spring Boot 2.2.x **☑**
- Neo4j Support
- Modulith, Microfrontends, Fully Reactive
